## 11 kW solar panel price

How much does an 11kW Solar System cost?

In 2025, the average cost of an 11kW solar system in the United States ranges from \$22,000 to \$31,000 before incentives. This includes equipment, labor, permitting, and associated materials. Here's a more detailed cost breakdown: -> [Explore other system sizes and their costs here](#)  
Several elements influence the total cost of your 11kW system.

How many solar panels does an 11kW Solar System need?

Depending on the efficiency of the solar panels, an 11kW system typically requires 28 to 36 panels. Higher-efficiency panels reduce the total number needed and are often preferred in areas with limited roof space. [How Much Does an 11kW Solar System Cost in 2025?](#)

Are 11kW solar systems a good choice?

11kW solar systems are closer to commercial systems than to residential installations. Most times you won't have enough space on a roof to put all the modules for it there. That's why you might want to go for a ground-based installation when it comes to systems of that scope.

How much energy does an 11kW Solar System produce?

An 11kW solar system can generate around 14,000 to 16,500 kilowatt-hours (kWh) per year, depending on your location and panel orientation. The more sun your area receives, the more your system will produce. Here's what the return on investment could look like:

Depending on the efficiency of the solar panels, an 11kW system typically requires 28 to 36 panels. Higher-efficiency panels reduce the total number needed and are often ...
