
12V 2A Uninterruptible Power Supply

What is a 12V uninterruptible power supply?

This is a simple and fully automatic, 12V uninterruptible power supply system for small/medium power appliances. This power supply specifically designs to drive routers and modems to provide uninterrupted internet and telephone services in areas affected by frequent power failures.

How does a 5V uninterruptible power supply work?

Many commonly available 5V Uninterruptible Power Supplies feature a two chip design with a Li-Ion battery charger to charge the back-up battery, and boost converter to step up the battery voltage back up to 5V. Like most of my personal designs, cost was not a primary driver.

Does the UPS battery have a 12V power source?

Customers appreciate the UPS battery's 12V power source, with one customer noting it can handle devices running on 12V DC. Customers appreciate the UPS battery's adapter selection, with one mentioning it includes adapters for most routers and another noting the variety of changeable cable ends provided.

What is a 12V router mini ups?

Wide Appliance: Small uninterruptible power supply for power outages, compatible with routers, modems, security cameras, fax machines, fingerprint recorders, DSLs, etc., and still able to use the network in case of power outages. The 12V router mini UPS is just like a power bank backup battery for router, modem, dvd, camera & lamp etc.
