## 12v inverter changed to 96v inverter

What is a 96V inverter built-in Charger?

It optimizes power conversion,minimizing energy losses and extending battery life,thus maximizing the effectiveness of your energy storage system. 96v inverter built-in charger allows for you to use your existing grid power to maintain a charge on your batteries.

How does a 12V to 120V inverter work?

Dave Orton on the Sprinter Forum pioneered the use of a 12v to 120v inverter to take 12v power from the running engine and turn it into 120v, then send that 120v power to wherever the house battery is placed. The 120v runs a charger (or runs through an inverter) to recharge the house battery. Why would you do this? The inefficiencies are crazy.

What is a 6V to 12V converter (inverter)?

The PGPI is a 6V to 12V converterfor vehicles that still have a 6V,positive ground electrical system. It is necessary if you are still running positive groundfor all of our radios,which run on a 12V,negative ground electrical system. The PGPI positive ground inverter comes with detailed wiring instructions.
