What is a 18650 battery pack?

A 18650 battery pack is a type of battery pack that uses 18650 cells. These cells are commonly found within old laptop batteries. The battery pack is very safe; the balance connector makes sure that the cells do not get overcharged, and the shrink-wrap makes sure that the battery cells are not short circuited.

Why is 18650 lithium ion battery a good choice?

This leads to higher gravimetric energy densities for the Li-Ion cell. 18650 lithium ion battery pack has low internal resistance and high flat voltage characteristics during strong current discharge, which ensures a wider application field. Provide long storage life with few limiting conditions.

What are ionic lithium ion deep cycle batteries?

Features of ionic Lithium-ion Deep Cycle Batteries: Light weight, up to 80% less than a conventional, comparable energy storage lead-acid battery. Lasts 300-400% longer than lead-acid. Lower shelf discharge rate (2% vs. 5-8% /month). Drop-in replacement for your OEM battery. Expected 8-10 years of battery life.

What is a lithium ion battery?

A. Lithium-ion batteries are rechargeable batteries in which lithium ions move from the anode to the cathode during discharging and back when charging. They are popular batteries for use in consumer electronics because they provide high energy density, possess no memory effect and have a slow loss of charge when not in use.
