# 1KW solar panel

How much does a 1kW Solar System cost?

In 2025, a 1kW solar system in the U.S. typically costs between \$2,500 and \$3,500 before any discounts, with prices averaging \$2.50 to \$3.50 per watt for home setups. This covers the panels and installation. Costs can differ depending on where you live, the type of panels, and the company you choose. The good news?

What is a 1kW Solar System?

A solar panel is the main component of a solar system, as it is responsible for capturing and converting the energy from the sun into usable electricity. The larger a solar system is, the higher its price will be. So, if you're looking for a cost-effective way to get started with solar, a 1kW solar kit is the most suitable solar option.

Who is a 1kW solar panel system suitable for?

A 1kW solar panel system is an entry-level solution for homeowners looking to reduce their carbon footprint and gain some energy independence. It's particularly suitable for small households or those just beginning their solar journey.

How much electricity does a 1 KW solar panel produce?

For example, a 1 kW solar panel system will produce 1 kW of electricity for a few hours a day, but only when it's a clear sunny day. Below is a chart showcasing a 1 kW solar panel's electricity output over a summer's day. You can see that 1 kW is only generated at noon (when the sun is at its strongest):
