
2025 PV Module Exports

Where do solar PV exports come from?

The latest solar PV export data from the world's largest exporter, China, by country or region of destination. Data updated on a monthly basis. An interactive chart showing monthly solar PV exports from China, the world's largest exporter, by selected country or region of destination. China's exports account for 80% of global solar PV exports.

Why did PV shipments decline in Q1 2025?

Margins for the leading PV wafer, cell, and module manufacturers continued to decline through Q1 2025, due to record-low pricing. From 2019 to 2024, shipments from the top 10 PV manufacturers grew from 78 GW to 533 GW, with some companies shipping more than 75 GW annually. Approximately half of 2024 shipments came from the top six companies.

How did China's PV development surge affect module prices in Q1 2025?

Module spot prices rose 2% in Q1 2025 and remained around \$0.09/Wdc. The impact of China's PV development surge on module prices was muted by the persistence of oversupply conditions and poor economics for module manufacturers. Global polysilicon spot prices rose 12% in Q1 2025, from \$5.54/kg to \$6.24/kg.

How many PV cells did the US import in Q1 2025?

According to U.S. Census data, the United States imported 4.4 GWdc of PV cells in Q1 2025, leveling off the meteoric growth from the last 18 months. By April 29, the United States had already imported 5 GWdc of cells. If imports were to continue at the current rate, the TRQ would be exceeded by mid-August, halfway through the tariff-year.

China's solar module exports rose 8% YoY in July 2025, totaling 21.25 GW shipped, according to InfoLink Consulting Europe remained the largest market, importing 47% ...

PV modules are the central component of the solar industry. This analysis reviews market conditions that affect solar panel pricing and ...

Spring 2025 Solar Industry Update David Feldman, National Renewable Energy Laboratory (NREL) Jarett Zuboy, NREL Krysta Dummit, Solar Energy Technologies Office ...

In Q1 2025, China's PV module exports to the EU amounted to \$1.8 billion, down 38.8% year-on-year, with volume at approximately 18.6 GW, a 15.6% decline. China's share of ...

Comprehensive overview of PV components exports, covering HS classification (8541430000 for assembled modules), declaration requirements, international FTA benefits ...

China exported 235.93 GW of PV modules in 2024, up 13% from 207.99 GW in 2023, according to customs data from PV InfoLink. ...

India's PV module exports have grown steadily in recent years. The nation exported around

\$83 million worth of modules in fiscal ...

Annual Market shares- FY2025 Modules: Waaree, Jinko and Longi were the top three module suppliers in India in FY2025. Module Export: In FY2025, ...

The 200 square meter facility is targeting an annual manufacturing capacity of 2 GW of solar cells and 2 GW of solar modules. The solar cell production will be 100% for export.

Exports of both PV cells and module from China in 2024 reached new highs, according to recently released customs data.

From 2025-2030, our base case outlook puts total solar deployments at 246 GWdc - virtually unchanged from our Q3 2025 outlook. While our commercial and community solar outlooks ...

India's solar photovoltaic (PV) module exports have seen a remarkable surge, increasing nearly 23-fold from FY22 to FY24, according to a report by the Institute for Energy ...

In Q1 2025, China's PV module exports to the EU amounted to \$1.8 billion, down 38.8% year-on-year, with volume at approximately ...

InfoLink's customs data shows that China exported 21.25 GW of modules in July 2025, down 2% MoM but up 8% YoY from 19.62 GW. China's total module exports from ...
