## 240v circuit breaker for sale in Melbourne

What is a 240V circuit breaker?

A circuit breaker 240V is also known as a double-pole circuit breaker. It is mainly used to protect a dedicated circuit for high-power appliances such as electric ranges, air conditioners, and more. This breaker is rated chiefly from 20 to 60 amps. Since a 240V breaker is as big as two 120v breakers, it takes up two places in a load center.

What breaker size is best for a 240V circuit?

To know what breaker size is best for your 240V circuit, you should first compute your device's total amp rating. Moreover, it would be best if you also considered the 80% electrical rule. For the computation, identify the total wattage of your device, then divide it by its voltage rating.

Which 240V equipment should I buy?

Ensure the safety and efficiency of your electrical systems with our range of 240V equipment, including DIN enclosures, safety switch/circuit breaker combos, and power inlets. With popular items from brands like GEN3 and Transco, you can rely on their outstanding quality and performance.
