## 245 to 220v inverter

How much power does a 240V inverter use?

Running on 240v from an inverter would use the same power as running on 12v plus the power the converter consumes. With 2 say 100A/H leisure batteries and not wanting to discharge them more than 50% you would be looking at approx 6-10 hours depending on model of fridge. Two x 85 amp batteries and a 140w SP.
