What size solar inverter should I buy?

The size of a solar inverter is usually measured in Watts. When purchasing a grid tie power inverter, you have to make sure it suits the size of your solar panel system. For example, if your solar panel array has a combined power of 5kW then a 5,000 W inverter should be just right for it.

What is a solar inverter?

A solar inverter or photovoltaic (PV) inverter is a type of power inverter that converts the variable direct current (DC) output of a photovoltaic solar panel into a utility frequency alternating current (AC) that can be fed into a commercial electrical grid or used by a local, off-grid electrical network.

What is a 5KVA solar inverter?

A 5kVA solar inverter is a portable size multi-function inverter that combines the functions of a solar inverter, solar charge controller, and battery charger to provide you stable and uninterrupted power supply. UTL 5kVA solar inverter are next-generation solar inverters with sleek artistic design, high efficiency and also are easy to install.

Where to buy solar inverter?

Inverter.com online store provides a complete range of solar inverters for your photovoltaic system including on grid inverter (grid tie inverter), off grid inverter, micro inverter and solar pump inverter with lower cost. Choose inverter.com to buy your solar inverter benefit from the superior quality, best price and flexible delivery.
