
Asian solar module export companies

Why is Southeast Asia a top exporter of solar power equipment?

In little over a decade, Southeast Asia has become one of the world's top exporters of solar power equipment - a success driven significantly by the relocation of Chinese manufacturers to the region. But now, the sector faces considerable challenges as US tariffs cut off their main export market, intensifying pressure on a previously booming trade.

Where do Southeast Asia's Solar Exports come from?

Southeast Asia's solar exports have primarily targeted the US, with more than 80% of the equipment it imported in the first half of 2024 sourced from Malaysia, Vietnam, Thailand and Cambodia, according to BloombergNEF. But this successful run is now under threat.

Is PV module manufacturing in Southeast Asia under pressure?

Thanks to new data, this edition includes entries such as ICA Solar and United Renewable Energy (URE), reflecting the evolving landscape of PV manufacturing in the region. Despite strong ambitions, PV module manufacturing in Southeast Asian is currently under pressure.

Why are Chinese solar companies moving to Southeast Asia?

Ever since finding themselves in the crosshairs of US import tariffs in 2012, Chinese solar manufacturers began shifting their production to Southeast Asia to circumvent trade barriers. More recently, overcapacity and brutal price wars in China's domestic market have accelerated these international relocations.

June 2025 The first 2025 edition of the Southeast Asia Solar Supply Chain Map includes significant revisions and additions, driven by valuable market feedback and the region's ...

Top 13 largest Chinese Companies in the Solar industry by Market Cap This is the list of the largest public listed companies in the Solar industry from China by market ...

The top 10 photovoltaic module producers in 2023 Chinese companies not only swept the podium but also took six additional spots in last year's top 10. Leading the pack was ...

Southeast Asia's solar exports have primarily targeted the US, with more than 80% of the equipment it imported in the first half of 2024 sourced from Malaysia, Vietnam, Thailand ...

Check out the top solar panel manufacturers in China, such as JinkoSolar, LONGI, Trina Solar, Astronergy, and more.

II. Export Opportunities China is the world's largest producer of photovoltaic equipment and has a strong export capacity. The growing demand for photovoltaic products in ...

Exports of both PV cells and module from China in 2024 reached new highs, according to recently released customs data.

Regionally, Europe, the Middle East, and Africa all saw rising import volumes, while the Americas showed a slight decline, and the Asia-Pacific witnessed a significant downturn. ...

In recent years, Asia has emerged as a new hub for the photovoltaic (PV) industry. Southeast Asian countries, with their abundant solar resources, well-established policy ...

2025's top solar companies in Asia compared: Performance, market share & technological leadership. Includes JinkoSolar, LONGi, and Grace Solar mounting solutions.

The top 10 photovoltaic module producers in 2023 Chinese companies not only swept the podium but also took six additional spots in ...

2025's top solar companies in Asia compared: Performance, market share & technological leadership. Includes JinkoSolar, LONGi, and Grace Solar ...

Southeast Asia's solar exports have primarily targeted the US, with more than 80% of the equipment it imported in the first half of 2024 ...
