
Boston solar Power Station Energy Storage Project

How many energy storage facilities are there in Massachusetts?

The Massachusetts Energy Siting Facilities Board has approved two energy storage facilities with a combined capacity of 400 MW/800 MWh. This decision overturns previous rulings that hindered the development of these facilities. Once operational, they will fulfill 80% of the state's 1 GWh energy storage deployment target for 2025.

What are the largest battery energy storage projects in New England?

Cranberry Point and Cross Town are the largest battery energy storage projects in construction with planned operations in New England and are expected to be online by the summer of 2025. The Cross Town Energy Storage project commenced construction in April 2024 and is now the largest battery coming online in the region, Plus Power said.

Does ISO New England have a battery storage facility?

Why did the Commonwealth overrule solar and storage projects?

The Commonwealth overruled the decisions of its own siting boards and one town's moratoria on all solar and storage projects, paving the way for the imminent construction of two significant energy storage facilities.

Plus Power's Cranberry Point Energy Storage in Carver, Mass. The facility is a significant milestone in the buildout supporting New England's energy infrastructure and grid ...

This groundbreaking project, located on the coastal tidal flats of the Yudong Reclamation Area in Rudong County, marks a significant milestone as China's first integrated ...

The Commonwealth overruled the decisions of its own siting boards and one town's moratoria on all solar and storage projects, paving ...

Lightshift Energy and MMWEC deploy "first-of-its-kind" program for grid-scale battery energy storage in Massachusetts. ...

Massachusetts' energy storage mandate requires investor-owned utilities to secure 5,000 megawatts (MW) of storage by 2030.

The Sturbridge Power and Carpenter Hill Power facilities will be built at sites between Springfield and Boston. The projects are in the advanced stages of development. ...

Flatiron Energy's groundbreaking 300-MW battery storage project in Boston aims to enhance reliability and champion environmental justice by 2028. Powering a greener future ...

Plus Power has closed financing for a 150MW/300MWh standalone battery energy storage

system (BESS) project in Massachusetts, US.

The Commonwealth overruled the decisions of its own siting boards and one town's moratoria on all solar and storage projects, paving the way for the imminent construction of ...

The Daggett Solar and Storage project is a solar power generation and storage development in San Bernardino County, ...

Together, the Sturbridge and Carpenter Hill Power projects will deliver a combined 300 megawatts (MW) of energy storage capacity and are exceptionally sited with large ...

The Daggett Solar Power Facility - Battery Energy Storage System is a 450,000kW lithium-ion battery energy storage project located in San Bernardino, California, ...

A render of the building that would house the BESS project. Image: Flatiron Energy / System operator ISO New England has given ...

A rendering of the Cranberry Point Energy Storage project (Credit: Plus Power) Plus Power has announced the close of construction and term financing for the first major ...
