# Can solar panels be placed on roofs

Should you install solar panels on your roof?

Installing solar panels on your roof is not only good for the environment, but also beneficial for your wallet. In this blog post, we will outline the costs and yields of solar panels. The yields of solar panels depend on the number of panels and the power of the panels. The capacity of solar panels is expressed in Watt peak (Wp).

How to choose a solar roof?

Take full advantage of solar panels. The ideal rooftop is free of obstructions, such as trees or tall buildings. The roof should also be south-facing and have a slope that can hold a solar panel at a 15- to 40-degree angle and have a good . If your utility bill costs are constantly high, it might help.

How do you install solar panels on a roof?

A cost-effective and time-efficient way to deploy solar power is by installing solar panels on these roofs. The mounting process is akin to that of an on-roof system, with the rails secured to the roof ridges using self-tapping screws. This setup keeps the solar panels close to the roof to reduce wind impact.
