# **Chad energy storage power station foreign trade export enterprise**

Why is Chad a good place to invest in solar power?

Chad's location in the Sahel, which features brilliant sunshine especially during the dry season, and lack of alternate fuel sources such as coal make solar power an attractive export and investment sector. Chad currently generates electricity by consuming oil.

What is Chad services export & import?

Chad services export is in BoP, current US\$ and services import is in Bop, current US\$. Chad exports of goods and services as percentage of GDP is 51.19% and imports of goods and services as percentage of GDP is 39.57%. Chad Trade Statistics including exports and imports by partner and products, tariffs and relevant development indicators.

How does Chad generate electricity?

Chad currently generates electricity by consuming oil. With the declining cost of new solar generation plants, the Government of Chad and development partners have prioritized solar power throughout the country. Machinery and parts for electricity transmission and distribution are also in demand. Opportunities

Does Chad have positive net exports?

Chad has highly positive net exports principally in the international trade of crude petroleum oil. In turn, these cashflows indicate Chad's competitive advantages under the mineral fuels-related product category. Below are exports from Chad that result in negative net exports or product trade balance deficits.
