# China's solar container communication station EMS ranks first in the world

Which country has the most automated container terminals in the world?

The number of automated terminals under construction also ranks first globally, as per the country's Ministry of Transport. A fully automated container terminal at Qingdao Port in Shandong Province exemplifies China's advancements.

How many automated container terminals are there in China?

According to the latest data, China currently has 18 automated container terminals in operation with an additional 27 under construction or being upgraded. Notably, the country has acquired the key technical expertise from designing, constructing to integrating and managing advanced automated terminal systems.

How many TEU containers did China handle in 2023?

In 2023, China's ports handled over 257 million TEU containers, 4.9 percent higher than a year earlier. China is leading the world in the number of automated terminals, according to the Ministry of Transport, demonstrating its reputation as a maritime powerhouse.

What are China's advancements in container shipping?

A fully automated container terminal at Qingdao Port in Shandong Province exemplifies China's advancements. On January 1, 2024, a vessel docked at the terminal, and bridge cranes seamlessly loaded containers onto automated guided vehicles. High-speed rail-mounted gantry cranes efficiently stacked incoming containers.

China's ports will handle 17.6 billion tons of cargo and 330 million TEU of containers in 2024, continuing to rank first in the world, according to data released by the Ministry of ...

China ranks first in key indicators for the industry, including ship-owning, port cargo throughput, port container throughput, inland ...

An emblem of China's leadership in this realm is the Qingdao Port in Shandong Province. Qingdao Port is the world's first to have an air-track intelligent transporting system ...

The scale of China's automated ports currently ranks first in the world, according to the Ministry of Transport.

China now leads the world with 26 science and technology clusters in the top 100, reflecting the country's rapid growth in innovation ...

China has built 52 automated container terminals and dry bulk terminals so far, with the numbers of automated terminals both built and under construction ranking first in the ...
