# China solar powered generator in Brazil

Why is China investing in Brazil's energy sector?

China is massively investing in Brazil's energy sector, with structural projects in electricity production and transmission, accelerating economic development and integrating the country's power networks. Gain full professional access to [energynews.pro](https://energynews.pro) from 4.90\$/month. Designed for decision-makers, with no long-term commitment.

Why is China a strategic partner in Brazil?

China is solidifying its position as a strategic partner in Brazil through significant investments in the energy sector. These projects aim to meet the growing electricity demand and modernize infrastructure while boosting national energy capacity. The Panati photovoltaic park, located in the state of Cear  , is one of the flagship projects.

When did SPIC start building a power plant in Brazil?

The plant began construction in December 2022 and achieved successful power transmission on December 1, 2023, meeting the conditions for grid-connected power generation. Lin Guixiang, Chairman of SPIC Brazil, said at the commissioning ceremony that SPIC has always been committed to promoting green, innovative and integrated development.

Why should Chinese companies invest in Brasilia?

This network, designed to link renewable energy sources in the northeast to the capital Brasilia and other regions, is a critical lever for improving national electrical integration and attracting further investments in the sector. Chinese companies are diversifying their presence in Brazil beyond traditional power infrastructure.

The newly inaugurated solar parks, in the neighbouring states of Piaui and Ceara, have a combined capacity of 738 megawatts-peak (the maximum output under ideal conditions). ...

Chinese electricity company SPIC announced a \$147.41 million investment in new wind and solar farms in Northeastern Brazil, aiming to ...

China General Nuclear Power Group (CGN) has brought its first self-built greenfield solar power project in Brazil to full capacity operation, marking a significant ...

The Panati Photovoltaic Power Station in Brazil, invested and led by the Brazilian branch of China State Power Investment Corporation (SPIC), was officially put into operation ...

Chinese electricity company SPIC announced a \$147.41 million investment in new wind and solar farms in Northeastern Brazil, aiming to become one of the country's top energy ...

In recent years, the Brazilian government has actively promoted green energy transition, with clean energy cooperation ...

Among the top-selling models, eight are manufactured by Chinese companies. A Strategic
