
Circuit breaker fuse in China in Sydney

What are striker fuses?

Striker fuses are fuses fitted with a spring-loaded striking device that can trip adjacent switches and also indicate that a fuse has blown. A Type C fuse is actually a type of miniature circuit breaker (MCB). MCBs are a type of circuit breaker used with lower-powered circuits to cut off current in the event of an overload.

Who are the best Chinese circuit breaker companies?

Top Chinese circuit breaker companies, such as TOSUNLux, focus on producing reliable circuit protection devices verified by top industry certifiers. TOSUNLux is open to discussing custom low-voltage switchgear needs and offers tailored solutions for specialized installations worldwide.

What is a Type C fuse?

A Type C fuse is actually a type of miniature circuit breaker (MCB). MCBs are a type of circuit breaker used with lower-powered circuits to cut off current in the event of an overload. Type C fuses trip circuits when the current exceeds the rated one by between five and ten times - i.e. at 100-500 amps for a 20amp device.

Can a fuse block & fuse base be ganged together?

Some fuse blocks & fuse bases can be ganged together to create a single block with multiple fuse circuits. Our fuse blocks are quality products sourced from globally recognised manufacturers. A circuit breaker has a switching mechanism that is activated when unsafe levels of current flows through the circuit.
