
Completed projects of Aarhus Energy Storage Group in Denmark

Will Aarhus geothermal district heating project benefit Denmark?

Undoubtedly, Aarhus geothermal district heating project will ensure a distinct impact on the successful development of renewable energy in Denmark and serve as a viable example to other countries in Europe. Wellsite geologist, Garry Paton, working on the initial appraisal well at Aarhus port, December 2023

Can geothermal energy be used in Aarhus?

Following these successful wells, the project has entered into the construction phase of the heat exchange plant in Skejby. The project is designed to utilise geothermal energy by extracting 70°C water from a sandstone aquifer deep underground and then, transferring this heat to Aarhus's district heating network.

What is Innargi A/S doing in Aarhus?

Innargi A/S and partners are working together to build a large scale geothermal project in Aarhus, Denmark. Once completed in 2030, it will be the largest of its kind in the EU, with seven geothermal heating facilities planned across the city.

Innargi has completed drilling two geothermal wells at the Skejby site in Aarhus, Denmark and now moves to construction of the ...

A new geothermal district heating plant will heat thousands of homes by harnessing heat from the earth's core in Denmark's second ...

Turning negative emissions into positive change By 2030, we will create and operate one of Denmark's largest scale Bio-Energy Carbon Capture and Storage facilities at our district ...

Developer Better Energy is deploying its first major battery storage project, a 10MW/12MWh system, at one of its solar PV plants in ...

The North Jutland-based renewable energy specialist Aalborg CSP has partnered with Innargi to supply an integrated heat pump station ...

ANDRITZ AG, a global leader in sustainable industrial solutions and advanced clean air technologies, has been selected by ...

The planned capacity of the geothermal heating plant in Aarhus is 110MW, equaling 20% of Aarhus' district heating demand, and ...

With the drilling of two wells in the Skejby site now completed, Innargi now progresses to the next phase of the geothermal heating project in Aarhus in Denmark - the ...

The Danish cleantech company BattMan Energy, which specializes in implementing battery

storage systems (BESS), has chosen Hitachi Energy as the battery energy storage system ...

Aarhus, Denmark, unlocks deep geothermal heat with a 110 MW system, showcasing how cities can scale sustainable energy in ...

About 63% of collected municipal and commercial waste is recycled or reused at the present time. We are owned by the Municipality of Aarhus but operate as an independent corporation. By ...

The Future of Geothermal Energy in Denmark and Europe Undoubtedly, Aarhus geothermal district heating project will ensure a distinct impact on ...

The concept of storing renewable energy in stones has come one step closer to realisation with the construction of the GridScale demonstration plant. The plant will be the ...

Projects Project: Aarhus, Denmark In collaboration with district heating company KredsIøb, Innargi is bringing geothermal district heating to Aarhus, Denmark's second largest city. The first ...
