
Congo High Frequency Uninterruptible Power Supply

What is the supply voltage in Democratic Republic of Congo?

In Democratic Republic of Congo the supply voltage is 220V. If the appliance is a single voltage rated appliance, it will need to operate at the same voltage as the supply voltage of the country i.e. 220V. If this is not the case it should be used alongside a voltage transformer or converter to allow the appliance to work safely and properly.

What is uninterruptible power supply (UPS)?

Uninterruptible Power Supply (UPS power supply system) has been widely used in modern life, providing effective emergency power for various electronic devices, protecting them from power instability interference, and ensuring their normal operation.

What are the characteristics of contactless electronic regulated power supply?

The contactless electronic regulated power supply has the characteristics of high performance, high efficiency and energy saving, no electromagnetic interference, small size, light weight, fast response speed, and easy maintenance.
