## Continue to promote new energy storage

Will China develop new energy storage systems between 2025 and 2027?

BEIJING, Sept. 12 -- China on Friday unveiled an action plan to promote the development of new forms of energy storage between 2025 and 2027, amid efforts to support green energy transition and ensure the stability of new-type power systems.

Why are energy storage technologies important?

They are also strategically important for international competition. KPMG China and the Electric Transportation & Energy Storage Association of the China Electricity Council ('CEC') released the New Energy Storage Technologies Empower Energy Transition report at the 2023 China International Energy Storage Conference.

Why is China moving to a new type of energy storage?

The move is part of China's broader push toward a green, low-carbon energy transition as well as high-quality economic and social development. It builds on significant growth in the sector. As of the end of 2024, the country's installed capacity of new-type energy storage had reached 73.76 million kilowatts, according to official data.

What is the implementation plan for the development of new energy storage?

In January 2022, the National Development and Reform Commission and the National Energy Administration jointly issued the Implementation Plan for the Development of New Energy Storage during the 14th Five-Year Plan Period, emphasizing the fundamental role of new energy storage technologies in a new power system.

KPMG China and the Electric Transportation & Energy Storage Association of the China Electricity Council ('CEC') released the New Energy Storage Technologies Empower ...

It is essential to encourage the rational allocation of energy storage in new energy bases, promote the integrated planning of new energy and energy storage, and support the ...

China on Friday unveiled a plan to promote new-type energy storage between 2025 and 2027, amid support for green energy to stabilize the power grid. The country aims to ...

Promote industrial and commercial enterprises and industrial parks to configure new user-side energy storage, and support the construction and operation of distributed renewable energy + ...

BEIJING, May 24 (Xinhua) -- U.S. carmaker Tesla broke ground on a mega factory in Shanghai on Thursday to produce its energy-storage batteries Megapack. The move coincided with ...

Chinese authorities unveiled several measures on Monday to promote the new-type energy storage manufacturing sector, as part of efforts to accelerate the development of ...
