
Cyprus Industrial Park Energy Storage Project

How many energy storage applications have been approved in Cyprus?

The Cyprus Energy Regulatory Authority (CERA) representatives reported establishing a regulatory framework for energy storage in 2019, followed by market rules approval in 2021. The Cyprus Transmission System Operator has received 13 storage applications totaling 224 megawatts capacity, with eight applications processed and five under review.

Why does Cyprus waste so much energy?

AKEL MP Costas Costa characterised Cyprus as "the only country in the world where thousands of megawatt-hours go unused due to lack of centralised green energy storage systems," adding: "During the day we waste megawatt-hours because we lack storage, and at night we are one step away from blackouts."

Will a storage system be installed at Dhekelia Power Station?

Electricity Authority of Cyprus (EAC) Chairman George Petrou announced ongoing tender processes for installing storage systems at the Dhekelia power station, with company proposals expected by month-end. Industry representatives raised concerns about existing programs.

Cyprus has taken a step toward modernising its energy infrastructure with the commissioning of a 3.3 MWh battery energy storage system (BESS) as part of the Apollon PV ...

The government of Cyprus has published guidelines for a scheme to support the deployment of approximately 150MW/350MWh of energy storage.

Cyprus is poised to introduce large-scale renewable energy storage solutions by 2026, a move aimed at addressing the nation's increasing demand for effective energy ...

Cyprus has commissioned its first major battery energy storage system (BESS). Discover the 50 MW project's partners, technical details, and impact on grid stability and ...

Implementing the project will be an important step towards modernising Cyprus's energy sector, ensuring flexibility in managing network loads and supporting the transition to ...

Cyprus has taken a step toward modernising its energy infrastructure with the commissioning of a 3.3 MWh battery energy ...

The Cyprus Energy Regulatory Authority (CERA) representatives reported establishing a regulatory framework for energy storage in 2019, followed by market rules ...

Cyprus has commissioned its first major battery energy storage system (BESS). Discover the 50 MW project's partners, technical details, ...

The Apollon PV Park has commissioned a 3.3 MWh battery energy storage system (BESS)

and solar project, in a milestone for Cyprus.

Your Move, Energy Pioneers As the sun sets over the park's photovoltaic fields, one thing's clear - this isn't your grandpa's energy project. With dynamic pricing models that ...

The Department of Environment of Cyprus issued an approval for what could become one of the country's first battery energy storage systems.

Cyprus is poised to introduce large-scale renewable energy storage solutions by 2026, a move aimed at addressing the nation's ...

Cyprus will install its first large-scale energy storage system within 16 months to integrate renewables, stabilize the grid, and reduce electricity prices.

The government of Cyprus has published guidelines for a scheme to support the deployment of approximately 150MW/350MWh of ...
