# Djibouti large energy storage power supply price

How can Djibouti lower its energy prices?

Djibouti can reduce energy prices by diversifying energy sources toward renewables. The free port of Djibouti finances its own power supply but is not entitled to sell its surplus energy. A regulator is needed to fairly and effectively regulate electricity prices in Djibouti.

What is the current state of electricity in Djibouti?

Electricity sector: Current state ?Djibouti's electricity supply is based on : ?Thermal generation (diesel and heavy fuel oil): 20-40%. ?Hydroelectric imports from Ethiopia (since 2011): 60-80%. o The country's current energy production is 220 MW, broken down as follows ?Public generation of 120 MW by EdD

What is the source of Djibouti's energy?

Approximately 65 percent of Djibouti's electricity comes from external sources. The remaining energy comes from its own geothermal, solar, wind, and biomass sources. According to the International Renewable Energy Agency (IRENA), this reliance on imported energy can lead to price volatility that can hinder economic development plans.

How can Djibouti become an emerging country?

oDevelop a sufficient, clean and robust electricity supply to support the economic objectives of Vision 2035, to make Djibouti an emerging country. Strengthening and ensuring energy independence in terms of electricity supply Reducing fuel poverty among the population
