## Does the 80KW inverter have 8 MPPTs

How many MPPT's does a solar inverter have?

For a 16-panel solar PV system,a regular inverter might have 2 MPPTs. A Solar Edge system,however,has 16 MPPTs. This means that if,for example,one panel is shaded by a tree,cloud,or dirt,it will only affect the performance of the panels on that specific MPPT slightly.

How many MPPT inputs does a modern inverter have?

Most modern inverters are equipped with at least one MPPT input. The below article - which originally appeared as a response by Bradley Detjen to a question on Quora.com - explains MPPT using the most apt metaphor we've yet seen,so we thought it would be useful to share it with our readers.
