
Dominica Mobile Generator Power Station

Why is Dominica struggling with electricity?

Dominica's electricity sector is currently challenged by outdated infrastructure, largely dependent on aging diesel generators which result in high electricity expenses and an unreliable power supply, hampering the country's competitiveness.

What is the Dominican energy project?

This project is designed to support the Commonwealth of Dominica in developing and integrating clean, sustainable and low-cost energy. Through this \$38.5 million project, a new robust transmission network will be built to withstand natural hazards, strengthening Dominica's electricity grid.

How is Dominica transforming geothermal energy?

"Dominica is making significant strides in geothermal energy, with innovative investments to deliver clean, low-cost electricity to its citizens and thereafter, the Eastern Caribbean. With support from the World Bank and the Government of Canada, we are building a resilient network for geothermal energy transmission.

When will domlec generators be installed & commissioned?

This was according to Prime Minister Roosevelt Skerrit during a press conference on Wednesday. The units will be installed and commissioned by November 30, 2023. "DOMLEC has entered into a rental agreement with Aggreko, a US-based generator rental firm to lease two units generating 3 megawatts of electricity," he said.

The power station series has a wide range of products, with a variety of structures and functions, among which mobile power stations and low-noise power stations are widely used.

One significant project is the 4.8-Megawatt thermal leased generator at DOMLEC's Fond Cole Plant, which is expected to be ...
