
Dual wave solar panels

What is dualsun spring solar hybrid Pvt?

The Dualsun SPRING solar hybrid PVT panel is designed to maximize energy output by generating both electricity and heat. And when SPRING panels are combined with a brine-water heat pump, this power combination provides 6x more solar energy from rooftop surfaces compared to PV. In some cases, it's even up to 15 times more energy.

What is dual-use photovoltaic (PV)?

Dual-use photovoltaic (PV) technologies, also known as dual-use PV, are a type of PV application where the PV panels serve another function besides the generation of electricity.

Where are dualsun solar panels made?

In France! Our Dualsun SPRING hybrid solar panel (PVT) carries the Made in France label because it is proudly engineered and manufactured in France: Our team of engineers is based in Marseille in the South of France. Our factory is based in Jujurieux in the department of Ain.

How are dualsun solar panels recycled?

Dualsun panels are recycled via SOREN, the first worldwide take-back and recycling scheme for photovoltaic module waste. The cost of recycling is included in the initial price of the panel as an "eco-participation" cost. Solar power deployment took off 10 years ago, thus major recycling needs will be necessary in 10-15 years from now.
