# **Eastern Europe Lithium Energy Storage Power Supply Procurement**

What is the battery storage Europe platform?

The Battery Storage Europe Platform brings together industry leaders representing the battery storage value chain to advance the business case and regulatory frameworks for battery storage across the EU. Together, we urge a tenfold increase in battery storage by 2030 to ensure Europe's energy transition, security, and competitiveness.

Why should battery storage be a political priority in Europe?

Together, we urge a tenfold increase in battery storage by 2030 to ensure Europe's energy transition, security, and competitiveness. The mission of the Battery Storage Europe Platform is to make battery storage and flexibility a political priority by: Placing battery storage at the top of the EU agenda for energy security and competitiveness.

How can we improve battery storage in Europe?

Strengthening the business case and regulatory frameworks for battery storage across Europe by accelerating the implementation of existing electricity market and renewable energy legislation, and complementing it with a dedicated EU Flexibility Package and Storage Action Plan.

Signing ceremony for the 2GWh deal between Solarpro and Hithium. Image: Hithium Hithium will supply its latest 6.25MWh DC block ...

Under the agreement, Hithium will supply its Power 6.25 MWh battery energy storage system (BESS) product for utility-scale projects across Eastern Europe, including ...

HiTHIUM, a leading global provider of long-duration energy storage (LDES) technology, has signed a 2 GWh Master Supply Agreement (MSA) with Solarpro, Europe's top ...

The region saw two major announcements in the past week: one concerning what is described as the first hybrid power purchase agreement (PPA) to include green electricity ...

Solarpro, a leading technological provider of solutions for the generation and storage of energy in Europe, has successfully deployed ...

This session, held on 21 October 2025 in Lisbon at the MINEX Europe Forum, focused on the critical challenges and innovative solutions essential for securing Europe's battery material ...

The region saw two major announcements in the past week: one concerning what is described as the first hybrid power purchase ...

Europe's quest for a reliable lithium supply has entered a high-stakes phase as competition from Asia and North America intensifies. Recent negotiations between EU officials ...
