
Environmental Comparison of 80kWh Foldable Containers in South Sudan

What is the South Sudan Environmental Plan (CEP)?

The South Sudan Environmental Plan (CEP) was commissioned by EUD in June 2021 with the aim of identifying and assessing key environmental and climate change issues facing South Sudan.

Is South Sudan considered developed?

South Sudan, despite its wealth of natural resources, is considered one of the most underdeveloped countries in the world according to several reports, due to years of conflict.

Does South Sudan have natural resources?

The CEP reviews the South Sudan's national context and acknowledges that the country indeed has an abundance of natural resources, including fertile soils, water including river Nile, oil, forests, wetlands, wildlife, minerals such as gold, copper, etc.

How many foldable containers are needed for the Inland network?

Out of a total of about 5000 containers, an estimated fleet and critical mass of just 695 foldable containers are required for the inland network under study (and the rest of the containers being conventional ones), with a 71% load factor on the back haul.
