## Export large-size solar modules

Which countries import the most solar modules in 2024?

From January to December 2024, China exported 10.57 GW of modules to Spain, down 10% YoY from 11.75 GW, accounting for 11% of the Europe's total, while the Netherlands led with a 40% share. The Asia-Pacific imported 4.56 GW of modules from China in December 2024, down 10% MoM from 5.08 GW and down 30% YoY from 6.56 GW.

How many GW of modules did China Export in December 2024?

China exported 16.63 GW of modules in December 2024, up 9% MoM from 15.2 GW and up 3% YoY from 16.18 GW, according to InfoLink's customs data. China exported 235.93 GW of modules from January to December 2024, up 13% YoY from 207.99 GW.

How many PV modules did China Export in 2023?

Separately, market research firm InfoLink has also released an analysis report based on customs data, which pointed out that from January to December 2024, China exported a total of 235.93 GW of PV modules, an increase of 13% compared to 207.99 GW in the same period in 2023. Where do solar PV exports come from?

The latest monthly solar PV export data from the world's largest exporter, China, by country or region of destination. Ember China solar export dataset provides the following information: The IEA has stated that China's solar photovoltaic exports account for 80% of the global market.

The latest monthly solar PV export data from the world's largest exporter, China, by country or region of destination.

China's solar PV module exports hit 236 GW in 2024, with growth in all regions except Europe ... China exported 16.63 GW of modules in December 2024, up 9% MoM from ...

Exports of both PV cells and module from China in 2024 reached new highs, according to recently released customs data.

This reference to 'typical' packaging and shipping underlines, that there is globally no accepted and widely applied standard about the packaging, ...

Solar PV Global Supply Chains - Analysis and key findings. A report by the International Energy Agency.

China exported 235.93 GW of PV panels in 2024, a 13% increase over the previous year. Of this, 94.4 GW were shipped to Europe, down 7% from 2023.

This indicates that the development of China's solar PV module industry directly influences the global situation. Additionally, around 41 % of China's solar module production is ...

---

As part of the efforts to strengthen the European Union's (EU) energy security after the global energy market disruption caused by Russia's invasion of Ukraine, the European ...

China solar module exports in 2024 increased by 13% YoY to around 236 GW, according to InfoLink Consulting Barring Europe, there was growth for Chinese manufacturers ...

Grow Your Solar Module Export Business in Turkey Volza's Big Data technology scans over 2 billion export shipment records to identify new buyers, profitable markets, reliable ...

China exported 235.93 GW of PV modules in 2024, up 13% from 207.99 GW in 2023, according to customs data from PV InfoLink. Global module shipments increased 13% ...

The global solar panel manufacturing landscape has undergone exponential expansion, driven by declining technology costs, supportive government policies, and rising ...

InfoLink's customs data shows that China exported about 23.38 GW of PV modules in March 2025, up 44% MoM but down 5% YoY from 24.51 GW. China's total module exports ...

Export value of solar PV modules worldwide 2024, by country Export value of solar photovoltaic modules worldwide in 2024, by leading country (in million U.S. dollars)
