What are the advantages of a foldable container?

Compared with normal site office construction, there is cost saving for time, labor, transportation and warehousing convenience. The foldable container is movable with crane or forklift hence better accessibility. Installation and dismantling is also very fast and can be constructed within 25 minutes.

What is a foldable container?

A foldable container is one of the specialized container units made for transporting sets or stacks of materials. They are made of dense, sturdy wire mesh and are equipped with rollers for easy movement. These shipping container units are made more cheerful by the availability of a variety of coloured wire meshes. The Manufacturing Process
