
Government New Energy Storage Project

Will China develop new energy storage systems between 2025 and 2027?

BEIJING, Sept. 12 -- China on Friday unveiled an action plan to promote the development of new forms of energy storage between 2025 and 2027, amid efforts to support green energy transition and ensure the stability of new-type power systems.

What is an energy storage project?

An energy storage project is a cluster of battery banks (or modules) that are connected to the electrical grid. These battery banks are roughly the same size as a shipping container. These are also called Battery Energy Storage Systems (BESS), or grid-scale/utility-scale energy storage or battery storage systems.

What is the new energy storage action plan?

The new action plan, grounded in the nation's dual carbon goals, aims to grow the national new energy storage fleet to 180 GW by 2027. It responds to the urgent need for flexible energy regulation amid rapid renewable energy expansion.

How much government funding has been given to energy storage projects?

This was published under the 2022 to 2024 Sunak Conservative government Over £32 million government funding has been awarded to UK projects developing cutting-edge innovative energy storage technologies that can help increase the resilience of the UK's electricity grid while also maximising value for money.

In June 2024, a 100-megawatt-hour sodium-ion energy storage project began operation in Hubei province, representing the first large-scale commercial use of sodium-ion ...

The new policy has fully unlocked the value of independent energy storage as a power system regulator, an executive from a major energy storage equipment manufacturer in ...

New energy storage (NES) is a crucial technology for effectively integrating distributed energy sources and achieving a low-carbon transformation in the power sector. ...

The China New Energy Storage Development Report 2025 represents a major milestone in the institutionalization of NES planning ...

"China's advances in new-type energy storage are moving from isolated breakthroughs to a more systematic framework," said Rao Hong, chief scientist at China ...

Announced by the National Development and Reform Commission (NDRC) and the National Energy Administration (NEA), the new plan is expected to drive CNY 250 billion ...

The document outlines a clear and comprehensive development plan for the energy storage market across five dimensions: application scenarios, dispatchability, technological innovation, ...

China on Friday unveiled an action plan to promote the development of new forms of energy storage between 2025 and 2027, amid efforts to support green energy transition and ...

On December 16, Shanghai Electric Group officially signed an agreement with the People's Government of Tancheng County, Linyi City, for an all-vanadium redox flow battery ...

In June 2024, a 100-megawatt-hour sodium-ion energy storage project began operation in Hubei province, representing the first large ...

New energy power equipment maker Sungrow Power Supply signed three landmark energy storage contracts last year with Saudi Arabia's Alghazal Holding, becoming ...

The China New Energy Storage Development Report 2025 represents a major milestone in the institutionalization of NES planning and governance in China. By quantifying ...

New energy power equipment maker Sungrow Power Supply signed three landmark energy storage contracts last year with Saudi ...
