## High quality din rail breaker in Germany

What is a hmcb circuit breaker?

The HMCB series features High-Performance Miniature Circuit Breakers(MCB) designed for industrial applications with a compact 27mm module. Offering a high breaking capacity of 25kA,these breakers are suited for current ratings from 40A to 125A and come with B,C, and D tripping curves for tailored protection against overloads and short circuits.

Why should you choose ABB's DIN-rail modular devices?

ABB's DIN-Rail modular devices meet the highest possible safety standards, therefore they also comply with the specific standards of the railway sector such as fire protection, resistance to shock and vibrations and fire and smoke protection standards. Overcurrent protection is also required for EV charging solutions.

Can MCBS be used as global circuit breakers?

Thus, the devices can be used as global circuit breakers for OEMs, building global equipment. Our offering also includes MCBs that suit marine applications as they have a high breaking capacity, can be used at 440V and are certified by all major ship registers. They are available in all characteristics to meet the special requirements properly.
