## High quality isolator breaker in Australia

What is an enclosed isolator?

Enclosed isolators provide a reliable and robust solution for electrical isolation needs, ensuring a high level of protection for personnel and equipment.

What is an isolator switch?

Isolator switches, also known as disconnect switches or circuit breakers, are electrical devices used to disconnect electrical circuits from their power source. They provide a means of isolating circuits or equipment for maintenance, repair, or safety purposes.

What types of isolation switches are available?

Isolator switches are available in both single-phase and three-phase configurations, depending on the specific application and electrical system requirements. Single-Phase Isolator Switches: These switches are designed for single-phase electrical systems, where power is supplied by a single line and a neutral conductor.

Who makes RS isolator switches?

RS is a trusted supplier and distributor of isolator switches, offering a comprehensive range of high-quality products from leading brands such as RS PRO, ABB, Eaton, Schneider Electric, Siemens, and more. Our extensive selection ensures that you can find the perfect isolator switch for your specific application needs.
