What is High Tension Switchgear?

High Tension Switchgear (HT) is a type of switchgear designed for rated voltages of 12kv and 33kv, with current ranges from 400A to 3200A. These units are powder coated and designed to withstand rated voltages, as well as over voltages caused by lightning and breaker operation transients.

What is high voltage switchgear?

High Voltage Switchgear High voltage switchgears are usually chosen for the voltage range beyond 36kV. Since the voltage level here is greater, the arcing that is generated during switching operation is also high. Therefore, extra care and consideration is necessary while constructing these high voltage switchgear devices.
