# Household energy storage power supply price in Hanoi

Who manages the electricity market in Vietnam?

The Ministry of Industry and Transport is the government body in charge of managing Vietnam's electricity market and supply. It does this through the wholly state-owned power company Electricity Vietnam commonly known as EVN. EVN generates some power, but also buys power from wholesalers, and sells electricity to consumers.

How does the power market work in Vietnam?

Vietnam's power market operates on a 30-minute trading system, with prices updated every half hour. This Full Market Price (FMP) reflects the real-time cost of power and is used to settle payments in the wholesale market. The FMP includes: System Marginal Price (SMP) - a dynamic price based on supply and demand.

Can businesses buy power from power generators in Vietnam?

Vietnam issued a decree on Direct Power Purchase Agreements on July 3, 2024, clearing the way for businesses to buy power directly from power generators. The decree was a long time coming and has been touted as a critical component to developing Vietnam's electricity network.

How much does electricity cost in Vietnam?

However, the disparity in electricity pricing between customer groups remains stark, with the highest rate for business users reaching VND 5,422/kWh, while manufacturing rates top out at just VND 3,640/kWh. Vietnam's electricity pricing structure remains problematic. Photo: Hoang Giam
