# How long is the warranty period of the solar container battery manufacturer

What is a solar battery warranty?

A solar battery warranty is a manufacturer's promise that the battery will perform as expected for a certain number of years, cycles, or total energy throughput -- whichever comes first. A good warranty helps reduce your financial risk by covering repair or replacement if the battery fails under normal usage.

Are solar panels covered under a warranty?

No. Warranties generally don't cover: These exclusions are why many Australians also choose to insure their solar system. Check with your home insurance provider or solar retailer about adding battery coverage. Even if your warranty ends or is denied, you may still have rights.

What happens if a solar battery warranty disappears?

The Australian Consumer Law states that your warranty claim is with the importer or the local office of the brand. But if they disappear, you may be left without support. To reduce this risk: You can learn more about installer and retailer responsibilities via Solar Accreditation Australia. Do Solar Battery Warranties Cover Everything?

How long does a battery last under warranty?

This defines the number of full charge/discharge cycles a battery can perform under warranty. A common figure is 6,000 cycles, which equates to about 16 years if used once per day. However, warranties usually end when either the cycle count or the years are reached -- whichever is sooner. 3. Throughput Warranty
