## How much does the generator container cost

What are the different types of container generators?

We can supply the 20' container, 40' container, and widen or heighten container type. They are divided into the normal type and silent type. This series generator set can be easily moved to the desired location, can run under the most demanding working conditions.

How much does it cost to run a generator per day?

Installed home generators can cost up to \$30 per day to run during an extended power outage, due to their high power and gas consumption. However, running it on standby/test mode will cost no more than \$5 per month.

How much does it cost to ship a generator?

The cost to ship a generator can vary quite a bit, from a few hundred dollars for a small, residential standby generator, to thousands of dollars for a large industrial generator. Shipping costs are typically charged at a per-mile rate.

How much does a small portable generator cost?

A small portable generator costs between about \$300 and \$1,200. This depends on its power and size. Portable generators are a more affordable option if you cannot afford the cost of a full-house backup energy source. They are much less expensive than permanent models and do not require installation.

Shanghai Metal Corporation is a trusted Generator Container supplier in China, we have extensive inventory of Generator Container, and other metals in various alloys and tempers.
