
How to choose an outdoor power source for camping

What power supply do I need for my camping equipment?

It is their site and their power supply after all. Normally the supply is 230V 50Hz single phase, much the same as you would find at home. Always make sure your camping equipment conforms to these standards, a label on the back or the bottom of your device will usually have this data.

Do you need a portable power setup for a camping trip?

Whether you're heading out for a weekend in the woods or building a longer off-grid setup, having the right portable power setup can make or break your camping trip.

How can I get electrical power while camping?

To get electrical power while camping, there are several alternatives to EHUs. These include using gas, solar panels, generators, and leisure batteries. While most campsites offer electrical hook up as standard, you may need to rely on these other sources if your campsite doesn't have EHUs or when camping in remote places.

How do you bring power outdoors?

The fastest way to bring power outdoors is to install a receptacle directly behind an existing indoor outlet. Alternatively, you can drill through the wall from a basement or crawlspace and attach a receptacle on the house exterior using an extension ring. Position your outdoor receptacle at least 16 inches above the ground to prevent water damage.
