# How to configure a solar system

How do I design a solar system?

Designing a solar system means matching energy use with the right setup. Start by calculating your energy needs using past bills. Roof orientation, slope, and shading directly impact performance. Choose efficient, durable panels with strong warranties. Select an inverter suited to your roof, shading, and storage plans.

How do you set up a solar system?

Here are the 7 steps to setting up your solar system: Step 1: Evaluate your production potential. Step 2: Evaluate your daily needs. Step 3: Design a system for your budget. Step 4: Install your solar panels. Step 5: Set up your inverter, solar charger, and battery. Step 6: Connect your system.

Should you DIY a solar panel system?

Setting up a solar panel system can be one of the most exciting home projects you'll ever take on, whether you're ready to tackle it yourself or prefer to bring in the pros. DIY offers that hands-on satisfaction--the thrill of piecing together your own energy source, step-by-step, right on your roof.

What equipment do I need to set up a solar system?

You will need the following components to set up a solar system: Solar panels. Charge controller. Batteries. Inverter. Electric safety equipment. Below, you'll find the equipment needed to convert the sun's energy into usable electricity.
