## Huawei Niue solar container battery pack

What is the storage system made by Huawei Luna 2000?

The storage system made by Huawei LUNA 2000 is available. The system can be modulated with lithium batteries from 5KWh to 15KWh. High-voltage lithium iron phosphate (LFP) batteries have a very stable and resistant chemical structure. This technology allows optimization of the energy level of the battery pack.

How does the Huawei Luna battery pack work?

This technology allows optimization of the energy level of the battery pack. Huawei Luna consists of the Power Module, the electronic component and 5 kWh battery packs. The modular design allows to expand the storage capacity from 5 KWh up to 15 KWh with the possibility of stacking up to 3 battery packs (of 5 kWh each) for each system.

How does the Huawei app work?

The Huawei APP allows immediate commissioning and detects any faults and/or malfunctions in real time and allows you to manage loads and check the status of the battery and storage. LUNA batteries are guaranteed for 10 years and have an IP65 protection rating. They can be installed on the floor or on the wall (optional).
