
Huawei's energy storage project under construction in Cambodia

What is Huawei's smart string energy storage technology?

The newly completed 12MWh energy storage project, which was developed in collaboration with SchneiTec, a renewable energy developer, features a 2MWh testbed designed to validate Huawei's Smart String grid-forming energy storage technology. The grid-forming technology was on display at Intersolar Europe 2025 last month.

Will Cambodia achieve 70% renewables by 2030?

Cambodia is targeting 70% renewables by 2030. Image: Huawei Digital Power. Huawei Digital Power has successfully commissioned what it claims is Cambodia's first grid-forming battery energy storage system (BESS) certified by T&V S&D.

Does Cambodia have a decarbonisation strategy?

Indeed, Cambodia received a 49% tariff on products, the highest of all countries in the region. Despite this, the country is continuing to press on with its decarbonisation journey and attracting international manufacturers to invest in its transition while also catering for the global market.
