
India Solar Storage Container 15kW

How much does a 15 kW solar system cost in India?

A 15 kW solar system implemented in India costs from INR6,00,000 to INR12,00,000 based on its specifications. The cost for on-grid systems stands at INR6,00,000 to INR8,00,000, which includes both panels and inverter components. The 15 kW off-grid solar system requires additional battery costs that amount to between INR10,00,000 and INR12,00,000.

How long does a 15 kW solar system last in India?

The typical payback period for a 15 kW solar system in India is 4-6 years, after which the electricity generated is essentially free for the system's lifespan, which can exceed 25 years. 15 kW solar system is a worthwhile investment for Indian households and businesses seeking energy independence, cost savings, and sustainability.

What is a 15 kW solar system?

Unlike the typical 15 kW systems available in the market, SolarSquare offers a 15.12 kW system, leveraging our advanced 545-watt Monoperc half-cut bifacial modules that deliver more power per panel. A standard 15 kW system would require 27.7 panels, which is impractical because partial panels cannot be installed.

Does India offer a subsidy for a 15 kW solar system?

The Indian government offers a subsidy for the installation of a 15 kW solar system through the Ministry of New and Renewable Energy (MNRE). The subsidy is designed to encourage the adoption of solar power by making it more affordable for individuals and businesses.
