
Integrated solar panels on the roof of the sun room

What is a solar roof?

Solar Roof is a roofing and solar energy solution that is fully integrated. Once installed, the solar panels themselves will become the primary roof of the building. There is no panel racking and only a small amount of exposed conduit.

What are in-roof solar panels?

In-roof solar panels, also known as integrated solar panels, are solar panels that are installed directly into the roof structure instead of being mounted on top. They replace the roofing material itself and sit flush with the roofline, providing a seamless aesthetic that traditional solar panels do not. Are in-roof solar panels as efficient?

Are in-roof solar panels right for Your House?

They integrate smoothly into your roof during construction or when you're replacing an old roof, avoiding the visual clutter of typical installations. Blending seamlessly with your roofline, in-roof solar panels can be a game-changer for your home. Here's why:

How do in-roof solar panels work?

Just like traditional solar panels, in-roof versions use photovoltaic cells to turn sunlight into electricity. The big plus? They integrate smoothly into your roof during construction or when you're replacing an old roof, avoiding the visual clutter of typical installations.
