## Inverter installation price

How much does a solar inverter cost?

The inverter is a crucial part of your solar investment, whether you're on the grid or building an off-grid solar system. It connects your solar photovoltaic panels to your home and the grid, determining whether your energy is usable, storable, or wasted. Expect to pay \$1,000 to \$3,500, depending on type, size, and features.

How much does a microinverter cost?

While they cost more than string inverters, averaging \$1.15 per watt, they offer the benefit of independent panel optimization. For a 5 kW system, the cost is approximately \$5,750. Microinverters generally come with warranties of around 25 years, which aligns with the expected lifespan of the solar panels themselves.

Where should a solar inverter be installed?

Depending on the type, contractors install inverters directly on the backside of the solar panel, on the side of the house, on the roof, or inside a garage. Get free estimates from solar panel installers near you. Factors that affect solar inverter costs include:
