
Jordan outdoor power conversion factory

How did Jordan become a manufacturing powerhouse?

Despite the economics, how Jordan became a manufacturing powerhouse is more about politics than purchasing power. When the 1994 peace accord was hammered out between Jordan and Israel, a key economic element was introduced: the Qualifying Industrial Zone (QIZ).

Is there a cap on solar PV projects in Jordan?

In September 2024, Jordan's Council of Ministers lifted the cap on solar PV project sizes, enabling large-scale installations. A notable example is a 50 MW solar power plant financed by Cairo Amman Bank and currently under construction.

Why does Jordan need a solar PV installation & maintenance service?

Since Jordan started the solar PV installation in 2012, the demand for solar PV operation and maintenance (O&M) services increased, driven by aging systems requiring inverter replacements (every 8-10 years) and system optimization.

How many solar PV projects are there in Jordan?

Jordan Electric Power Company (JEPCO): 591.44 MW (32,257 projects). Irbid Distribution Company (IDECO): 309.32 MW (28,588 projects). Electricity Distribution Company (EDCO): 181.10 MW (13,300 projects). The global decline in solar PV system prices fueled strong demand for installations during the first half of 2024.

The 50 MW PV Power Plant in Ma'an, Jordan, reached a key milestone with the successful Factory Acceptance Test (FAT) of its inverters at Sungrow ...

Choosing a site for your solar factory in Jordan? This analysis compares Ma'an and Aqaba on energy costs, logistics, and incentives to ...
