Why did the US impose a tariff on solar panels?

The U.S. government finalised steep levies on imports of solar cells and modules from Vietnam, Malaysia, Thailand and Cambodia in April, following two rounds of tariffs in June and November last year, to prevent dumping by mostly Chinese-owned factories in these countries.

How did Chinese tariffs affect the solar industry?

o Consequently, growing cost disparities between Chinese and Western products, coupled with frequent tariff circumvention practices, undermined the efficacy of the Western tariff regimes. Ultimately, tariffs failed to deliver any meaningful development in the US and European solar manufacturing sectors.

Are tariffs affecting the solar industry?

Ultimately, tariffs failed to deliver any meaningful development in the US and European solar manufacturing sectors. o Policy interventions and geopolitical alignments recently have significantly redirected investment flows, as evidenced by corporate announcements.
