# Male lithium iron phosphate battery pack customization

Are lithium iron phosphate batteries better than other lithium ion chemistries?

Despite having a lower energy density than other lithium-ion chemistries, lithium iron phosphate batteries can provide better power density and longer life cycles. Emerging Power is your premier lithium battery assembler. We manufacture custom lithium iron phosphate battery packs and assemblies for many applications.

Can Lithium Werks make a custom battery pack?

Lithium Werks' patented Nanophosphate® battery technology (designed by MIT and A123) can be used in your custom modules. We can design and manufacture custom battery packs using lithium iron phosphate (LFP) cells for your power or energy application. Robust cylindrical, prismatic, or pouch cells can be produced for your pack.

What are lithium iron phosphate battery stocks?

Lithium-based batteries, specifically lithium iron phosphate batteries (LFP batteries), have become popular for renewable energy storage and EV power. Lithium iron phosphate batteries are a favorite in the battery market, and as a result, investors are eager to get exposure to lithium iron phosphate battery stocks.

Are lithium iron phosphate batteries about to change the conversation?

Over the past decade, zillions of hours and billions of dollars have been invested in figuring out how to make solid-state lithium-ion batteries. Now it seems lithium iron phosphate (LFP) batteries may be about to change the conversation completely. One of the features of LFP batteries is they don't use cobalt.

Gushine's LiFePO<sub>4</sub> (Lithium Iron Phosphate/LFP) battery packs are engineered for long cycle life, outstanding performance, and stable operation across a wide temperature range, which is ...
