
Maximum power portable power supply for outdoor use

Do portable power stations make camping better?

A good portable power station makes camping better. These devices power lights, phones, and small appliances when you're outdoors. We spent three months testing power stations to find the best portable power stations for camping. We tested 30 portable power stations over 12 camping trips.

How much power does a portable power station need?

For portable power stations, capacity is measured in watt-hours (Wh), telling you how much energy the unit stores. Weekend adventures typically need 200-300Wh for smartphone charging and LED lighting. Glamping and campground camping with amenities require 500-700Wh units to power fans, portable coolers, and CPAP machines.

How many devices can a portable power station run?

So long as your portable power station has the right ports and enough capacity, it can run a massive range of devices, including phones, laptops, and desktops. Higher capacity units will also let you power large home appliances and charge electric vehicles.

What is the best portable power station?

A heavyweight beast of a power station, this unit boasts battery expansion, loads of ports, and the high battery capacity and output required to effectively run an RV, offer home back-up power supply, charge an EV, or help you live van life to the fullest. Read more below 4.
