
Mobile Energy Storage Container with Ultra-Large Capacity Product Quality

What is CATL's new energy storage system?

This is CATL's new move in the energy storage space after the April 2024 release of TENER, an energy storage system with zero degradation for five years. TENER is a standard 20-foot containerized energy storage system with a total capacity of 6.25 MWh, the highest energy in the world at the time.

What is CATL TENER energy storage?

To meet the expectation of a BESS system that has high energy density, small footprint, simpler AC-side configuration, and flexible deployment, we bring the latest CATL TENER energy storage solution. It breaks the limitations of power capacity and product transportation, and makes breakthroughs in space utilization, energy efficiency, and cost.

Is CATL TENER energy storage a BESS system?

"CATL has always been at the forefront of the energy transition," said Amanda Xu, CTO ESS and president of ESS Europe CATL. "To meet the expectation of a BESS system that has high energy density, small footprint, simpler AC-side configuration and flexible deployment, we bring the latest CATL TENER energy storage solution."

What is a two-in-one container system?

Rather than building a single oversized unit that would trigger regulatory and logistical issues, CATL introduced a modular "two-in-one" design. Each unit remains under 36 tonnes and functions as two 4.5MWh containers stacked together. This approach meets transport regulations in 99 percent of global markets and simplifies deployment.

Landmark innovation pairs high capacity with flexible transport, redefining large-scale energy storage
CATL today unveiled the TENER ...

On May 7th, 2025, CATL has unveiled the world's first mass-producible 9MWh ultra-large-capacity energy storage system solution, TENER Stack, setting a new industry ...

The world's biggest battery maker unveiled its latest utility-scale battery energy storage product- the TENER Stack - at the Smarter E ...

Landmark innovation pairs high capacity with flexible transport, redefining large-scale energy storage
CATL today unveiled the TENER Stack, the world's first 9MWh ultra-large ...

Contemporary Amperex Technology Co. Limited (CATL) has launched the world's first 9MWh ultra-large capacity energy storage system, the TENER Stack, at the ees Europe ...

CATL catapults itself into the record books after unveiling the TENER Stack, the world's first 9-MWh ultra-large capacity energy storage ...

Large-capacity and efficient battery energy storage technology can suppress interference from the external grid, ensure power quality for local users, and further achieve ...

These examples show how different BESS container sizes meet varying technical and commercial requirements. ACE Battery's ...

In April 2024, CATL unveiled a 6.25 MWh capacity energy storage system called TENER, promising zero degradation in the first five ...

MUNICH, May 7, 2025 /PRNewswire/ -- CATL today unveiled the TENER Stack, the world's first 9MWh ultra-large capacity energy storage system solution set for mass ...

On May 7th, 2025, CATL has unveiled the world's first mass-producible 9MWh ultra-large-capacity energy storage system solution, ...

CATL debuts 9MWh TENER Stack, the worlds first ultra-large energy storage system bins split-design transport compliance, 5-year zero-degradation cells, 20% cost ...

CATL (SHE: 300750) has rolled out a new energy storage system called Tener Stack in a bid to consolidate its position in the sector. ...

CATL catapults itself into the record books after unveiling the TENER Stack, the world's first 9-MWh ultra-large capacity energy storage system solution. The company ...
