# Monrovia South Solar Air Conditioning

What is solar air conditioning?

This technology represents a significant step towards sustainability in HVAC (Heating, Ventilation, and Air Conditioning) solutions. Solar air conditioning systems typically consist of solar panels, thermal collectors, heat exchangers, and absorption chillers or heat-driven compression systems.

Can a solar air conditioning system power a conventional HVAC system?

Alternatively, solar air conditioning systems can integrate photovoltaic (PV) technology to generate electricity for powering conventional electric air conditioning units. PV-powered systems are straightforward in design and can be installed as standalone units or integrated into existing HVAC systems with minimal modifications.

Are solar-powered central air conditioners a mini split?

Though solar-powered central air conditioners exist, most solar ACs are mini splits. Mini splits differ from central ACs because they don't require ductwork to operate. Traditional central ACs consist of an outdoor compressor that pushes air through evaporator and condenser coils to cool it.

Does a solar mini-split air conditioner work at night?

At night, you continue to save due to the official SEER 22 rating on this unit. This solar mini-split air conditioner design allows you to put solar cooling into the area where it's needed the most and avoid the security issues of an unsightly and noisy window unit.
