What are industrial inverters?

Industrial inverters are electrical power converters that change direct current (DC) to alternating current (AC). They are designed for industrial use to safeguard critical loads in places of high power shortage, such as high-rise buildings, offices, and industrial power plants. EnerTech delivers the finest industrial inverters that are efficient in saving energy bills even in the most extreme climatic conditions.

What is a PFC inverter?

A PFC (Power Factor Correction) inverter is an industrial inverter with a high current handling capacity and pure sine wave output. It is fitted with a single card-controlled system and an IGBT-based design. The PFC inverter saves 50% of the electricity and has an eight to ten hours battery backup.

Can industrial inverters be profitable?

Industrial inverters are profitable and are available in single and three-phase versions that work parallel to the grid. Their capacity ranges from 5KVA to 300KVA, and they come with a 32 bit DSP design display. The PFC battery saves 50% of the electricity and has an eight to ten hours battery backup.
