
New Energy Storage Project Exchange Meeting

Will the energy storage industry thrive in the next stage?

The energy storage industry is going through a critical period of transition from the early commercial stage to development on a large scale. Whether it can thrive in the next stage depends on its economics.

What is the 2026 Eesa Energy Storage Summit (Shanghai)?

The 2026 EESA Energy Storage Summit (Shanghai) aims to gather the core decision-makers of the energy storage industry chain, gather the wisdom and strength of top leaders, and jointly promote the sustainable and healthy development of the industry.

How many electrochemical storage stations are there in 2022?

In 2022, 194 electrochemical storage stations were put into operation, with a total stored energy of 7.9GWh. These accounted for 60.2% of the total energy stored by stations in operation, a year-on-year increase of 176% (Figure 4).

Why are energy storage technologies important?

They are also strategically important for international competition. KPMG China and the Electric Transportation & Energy Storage Association of the China Electricity Council ('CEC') released the New Energy Storage Technologies Empower Energy Transition report at the 2023 China International Energy Storage Conference.

There are some energy storage technologies that have emerged as particularly promising in the rapidly evolving landscape of energy storage technologies due to their ...
